

OASIS D Training Series

Integrating Data Collection into Patient Care

OASIS D: Module 1 – Welcome to OASIS

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of importance of clinically integrating the OASIS tool with ongoing assessment data collection to accurately score OASIS items for quality of care and evidence based practice by passing the post-test with a score of $\geq 80\%$ following the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS can be an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides foundational knowledge of the OASIS tool including its history, impact areas and role in the care planning process.

Contact Time

1.0 contact hour(s) based on 60-minute contact hour

OASIS D: Module 2 – Patient History and Demographics

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather and apply clinically driven patient assessment information specific to demographics, patient history and diagnosis to OASIS items by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS can be an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides knowledge of and skills in gathering the appropriate tracking, background and personal information and its importance in the ongoing, individualized plan of care for the client.

Contact Time

0.5 contact hour(s) based on 60-minute contact hour

OASIS D: Module 3 – System Review

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather clinically driven patient assessment information and appropriately apply it to OASIS items specific to the system review of the client by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides the home care professional with the knowledge to gather the appropriate assessment information related to the system review of the client and appropriately apply it to OASIS items specific to sensation, respiratory, genitourinary, and cognitive behavioral status.

Contact Time

1.0 contact hour(s) based on 60-minute contact hour

OASIS D: Module 4 – Integumentary Status

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather clinically driven patient assessment information related to the integument and appropriately apply it to OASIS items specific to the Integumentary system of the client by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides the home care professional with the knowledge and skills to gather the appropriate assessment information related to the integument of the client and appropriately apply it to OASIS items specific integumentary system.

Contact Time

0.8 contact hour(s) based on 60-minute contact hour

OASIS D: Module 5 Part A - Functional Assessment: Understanding “Ability”

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather clinically driven patient assessment information related to functional ability of the client and appropriately apply it to OASIS items specific to functional mobility and self-care by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill, the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides the home care professional with the knowledge to gather the appropriate assessment information related to the functional ability of the client and appropriately apply it to OASIS items specific to self-care and functional mobility.

Contact Time

1.0 contact hour(s) based on 60-minute contact hour

OASIS D: Module 5 Part B - Functional Assessment: Understanding “Ability”

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather clinically driven patient assessment information related to functional ability of the client and appropriately apply it to OASIS items specific to transferring, ambulating/moving, feeding and preparing-taking oral and or injectable medications by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides home care professionals with the knowledge and skills to gather appropriate assessment information related to functional ability of the client and appropriately apply it to OASIS items specific to transferring, ambulating/moving, feeding and preparing-taking oral and or injectable medications.

Contact Time

0.75 contact hour(s) based on 60-minute contact hour

OASIS D: Module 6 - Functional Assessment: GG Items

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately connect functionally oriented items as well as gather clinically driven patient assessment information related to self-care and mobility functional ability of the client and appropriately apply it to OASIS items by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides the home care professional with the knowledge of how to connect functionally oriented items as well as the skills to gather the appropriate assessment information related to the self-care and mobility of the client and appropriately apply it to OASIS items specific to self-care and mobility.

Contact Time

1.0 contact hour(s) based on 60-minute contact hour

OASIS D: Module 7 - Medication Assessments and Living Arrangements

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather clinically driven patient assessment information and appropriately apply it to OASIS items specific to drug regimen and medications as well as living arrangements and caregiver issues by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides the home care professional with the knowledge and skills to gather the appropriate assessment information and appropriately apply it to OASIS items specific to related to medications and living arrangements.

Contact Time

0.8 contact hour(s) based on 60-minute contact hour

OASIS D: Module 8 - Diagnosis and Care Planning

Course Learning Outcome

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather clinically driven patient assessment information and appropriately apply it to OASIS items specific to diagnosis and care planning by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides the home care professional with the knowledge and skills to gather the appropriate assessment information and appropriately apply it to OASIS items specific to diagnosis and care planning.

Contact Time

0.8 contact hour(s) based on 60-minute contact hour

OASIS D: Module 9 – Discharge Management

Course Learning Outcome(s)

As a result of participating in this learning activity, the learner will be able to:

- Demonstrate knowledge of how to accurately gather clinically driven patient assessment information related to the plan of care and discharge of the client and appropriately apply it to OASIS items specific to the discharge by passing final exam with score of $\geq 80\%$ at the end of the on-line learning activity.

Description

The OASIS tool is often viewed as yet another required document to be completed by healthcare professionals. However, with knowledge and skill the OASIS becomes an important tool in the process of patient assessment data collection, evidence based care planning and improving client outcomes.

This module provides the home care professional with the knowledge and skills to gather the appropriate assessment information related to the plan of care and discharge of the client and appropriately apply it to OASIS items specific to the discharge document.

Contact Time

0.75 contact hour(s) based on 60-minute contact hour

RCTCLEARN Approved Provider Status:

The RCTCLEARN.NET OASIS D Training Courses have been designed to meet the ANCC requirements for continuing education.

RCTCLEARN.NET is an approved provider of continuing nursing education by the Wisconsin Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

According to ANCC, contact hours from ANCC Approved Providers are accepted by all RN licensing boards nationwide. If you question the acceptance of these contact hours, we suggest you contact your board of nursing directly.
